

GM TH400

Extreme Duty Input Shaft

Part No.

35280-02

NOTES:

- For use with turbine support bushing in converter.
- Designed to be used with heavy duty forward drum **34554-01** and other aftermarket drums with compatible 28-tooth spline.
- Requires changing to a 35-spline turbine hub in the torque converter and use of pump cover big shaft stator tube kit **28154S-125** with larger inner diameter.

1. Preparation

Follow TH400 pump cover machining and stator tube assembly instructions in Sonnax big shaft stator tube kit **28154S-125**.

2. Installation

Press Sonnax extreme duty input shaft **35280-02** shaft into Sonnax heavy duty forward drum **34554-01** or other aftermarket drums with compatible 28-tooth spline.
